PROJECTS

Traveler web site

- Developed a static travel website using HTML and CSS with a well-structured layout and engaging design.

- Implemented JavaScript-based form validation for secure and accurate user input, though the site is not responsive.

KidKinder web site

- Developed a KidKinder educational website using HTML and CSS to create an engaging and visually appealing platform for kids learning.

- Used basic JavaScript to add simple interactivity for an improved user experience, though the site is not responsive.

EXPERIENCE

Teaching Experience

- Provided home tuition teaching experience for students from Grades 1 to 10 for approximately one year, focusing on effective learning techniques.

AREA OF INTEREST

- AIML
- Web Development
- Data Structures and Algorithms
